

SAN LINN

Junior Developer

✉ sabishinekobebe@gmail.com

☎ 09773643961

🎂 18th September 2001

PROFILE INFO

Junior Developer passionate about building scalable and maintainable web applications. Proficient in JavaScript, TypeScript, and React with hands-on experience in modern frameworks like Next.js. Strong problem-solving skills with a track record of participating in coding competitions. Seeking an opportunity to contribute and grow in a dynamic team environment.

EDUCATION

2017 - 2020

Bachelor's Degree in
Mechanical Engineering
(Incomplete - Currently on Break)

2023

ITPEC FE Exam
2nd Rank Nation Wide

2024

Code2Career Hackathon
2nd Runner Up

LANGUAGES

- English (B1)
- Japanese (N4)

TECH STACK

FrontEnd

- JavaScript
- TypeScript
- ReactJS
- NextJS

BackEnd

- NodeJS
- ExpressJS
- MySQL
- PostgreSQL

Tooling

- Jest
- Git/GitHub

EXPERIENCES

■ Junior Developer - Community Driven Project

- Collaborated with fellow junior developers to build a real-world-inspired web application under the guidance of an experienced developer.
- Designed and developed authentication system, dashboard, API integration using React, Tanstack query, and React Router
- Gained hands-on experience in agile development, version control (Git), and best coding practices.
- Worked in a team environment, handling code reviews, debugging, and performance optimizations.

■ Shop-Co E-commerce Platform for clothing

Tech Stack: NextJS, Server Actions, ShadCN, Tailwind CSS

Shop-Co is a full-featured e-commerce platform for selling clothing, designed for both customers and administrators. Built with Next.js and Server Actions, it delivers a fast and dynamic shopping experience with optimized performance.

The customer side offers dynamic product listings, cart management, and a smooth checkout process, ensuring an intuitive shopping experience. Meanwhile, the admin dashboard provides tools for managing products, tracking orders, and viewing sales analytics, allowing efficient business management.

■ Kumo- Social Media Platform for Content Sharing

Tech Stack: TypeScript, React, React-Router-Dom, Appwrite

Kumo is a social media platform where users can upload and share posts. It leverages Appwrite for backend services, ensuring a secure and scalable infrastructure.

The platform supports user authentication, post creation, and content engagement, providing a simple and engaging way for users to interact and express themselves.
